TERM I EDUCATION-TRAINING PROGRAM

AIM

During the first year, medical students who have completed preparatory English language education will primarily learn structure and function of human cells and microorganisms in a variety of molecular, biochemical, biophysical, physiological perspectives. Measurement and statistical evaluation of the scientific data is encouraged. To gain awareness about the meaning of human behaviors in relation to health, illness, health care and patient-physician relationship and to be aware of the experiences in history, literature, art, philosophy, ethics, law, anthropology, sociology and theology. To raise awareness about the regulations and services for the protection of health and prevention of diseases. Improvement of communication skills and basic information technologies in medicine is also promoted in a variety of ways. The students are introduced to good medical practice and will get basic skills in emergency life support and on routine medical examination. To gain information about the normal structure and functions of musculoskeletal systems. Within the scope of evidence-based medicine, students are endowed with skills necessary for accession to medical records and are mentored for critical review of published literature that finally culminate in a poster presentation at the end of the year.

Term I, 2026- 2027 (Academic Year, 34 Weeks)

No.	Committee	Start - End	Week	Theoretical	Practical	ECTS
101	Preventive Health And Medical Humanities	7 September 2026 - 16 October 2026	6 weeks	106	30	9
102	Molecular Basis of Life and The Cell	19 October 2026 – 4 December 2026	7 weeks	117	48	12
103	Genetics and Life Cycle	7 December 2026 – 5 February 2027	7 weeks	117	44	12
104	Skeleton System	8 February 2027 - 2 April 2027	6 weeks	77	52	12
105	Muscle System	5 April 2025 – 4 June 2027	8 weeks	84	47	15
			Total	**501**	**221**	**60**

RULES FOR THE STUDENTS

1. Students must attend course boards without exceeding the absenteeism limit specified in the relevant regulation and directive.
2. Students will attend course councils and exams in a clean and well-maintained manner.
3. The first lecture of each course committee is planned as an introduction to the lecture committee. In the introduction, students will be informed about the purpose of the course committee, learning objectives, scope, syllabus, measurement-evaluation methods and rules to be followed.
4. The theoretical and practical courses of the course board start and end at the times specified in the program.
5. In the course committee, theoretical courses, professional skills and other practical applications will be given by one-on-one faculty members.
6. All students will be taken to the theoretical exam of the course board after gaining proficiency in professional skills and practical courses.
7. Students will actively participate in the lessons with the relevant faculty member in professional skills and practical lessons.
8. Students will attend elective lectures, evidence-based practices and other practices at the times specified in the course Schedule.
9. Students will attend laboratories (Histology, Anatomy and Professional skills) in clean aprons.
10. Students will stay in the laboratories until the end of the course.
11. Students should bring a plain white sheet drawing pad and colored pencil to the histology laboratory.
12. When the duration of attendance is exceeded, the student is considered absent and cannot take the course committee exams.
13. In order to be successful in the relevant period and pass to the next level; the year-end grade of the students must meet the requirements specified in the relevant regulation and directive. The changes to be made in the examination regulations will be applied exactly.
14. After the course committee exam, all students and exam questions will be solved interactively.
15. Students will object to the exam questions by applying to the assessment and evaluation commission.
16. Feedback will be received from all students at the end of the course committee.

2026-2027 ACADEMIC YEAR TERM I

COMMITTEE I: PREVENTIVE HEALTH AND MEDICAL HUMANITIES

PREVENTIVE HEALTH AND MEDICAL HUMANITIES COMMITTEE AIM

AIM

Purpose of preventive health; To learn the primary protection of the nervous system, respiratory system, circulatory system, digestive system, excretory system, allergic, sexually transmitted diseases, blood diseases and all kinds of trauma. Also, to gain special knowledge to spend healthy periods in pregnancy, puerperium, neonatal, adolescent and old age. The aim of the humanities section in medicine; to know different health organizations and successful physicians, to know the intersection of medicine and different disciplines. To gain the health-related skills of an average individual other than the health professionals.

Preventive Health and Medical Humanities Committee Learning Objectives	Measurement Evaluation Methods
Knowledge	
LO 1. Know the primary protection from different causes of diseases that are contagious, heredatary etc. related to all systems (nerveus, respiratory, circulatory, digestive, excretory, blood) in children and adults. **LO 2.** Should learn prehistoric and first age medicine **LO 3.** Have knowledge about health sociology, interaction of medicine and art, health communication, and studies on the intersection of different disciplines **LO 4.** Know the history of medicine as well as professional ethics and ethical rules their importance **LO 5.** To know the use of technology in medicine **LO 6.** Should gain knowledge to explain primary prevention from home, traffic, occupational accidents and traumas in children and adults **LO 7.** To know international and national health organizations **LO 8.** To know what should be done to have a healthy pregnancy, puerperium, newborn, adolescence and old age. **LO 9.** To have knowledge about chemical and biological safety in laboratory **LO 10.** To know the methods of strengthening the immune system and prevention of allergic diseases **LO 11.** Should be describe the psychosocial approach **LO 12.** Should be informed about Nobel medicine awards **LO 13**. To have knowledge about the use of robots in disease diagnosis and treatment. **LO 14.** To have knowledge about radiation safety **LO 15.** To have Knowledge about healthy nutrition	**Theoretical Exam** **Midterm Exam**

2026-2027 ACADEMIC YEAR TERM I
COMMITTEE I: PREVENTIVE HEALTH AND MEDICAL HUMANITIES

Skill	
LO 16. Should know easy and fast access to information methods **LO 17.** Should be able to process, transmit and present information obtained in virtual environment **LO 18.** Should be able to apply the basic principles of patient physician communication **LO 19.** Should be able to apply sterilization and basic laboratory rules **LO 20.** Should be able to apply basic skills to protect their own health and safety **LO 21.** Should be take proper water sampling from drinking water **LO 22.** Should be demonstrate how to use comparator for determination of chlorine in water **LO 23.** Should be comprehend motivational interviewing techniques **LO 24.** Should be gain protective oral and dental health skills	**Professional Skill Practice Exam** **Laboratory Practice Exam**
Professionalism	
LO 25. He/she should be aware that the doctorate is a dignified and respected profession and he/she should be in a position to observe this throughout his / her whole career. **LO 26.** Always be aware of professional ethics in relations with colleagues **LO 27.** Be aware of the importance of teamwork in the practice of medical profession **LO 28.** To adopt the importance of current scientific knowledge in medicine **LO 29.** Should be aware of the social status of the physician and the rules that determine the relationship between the physicians, the patient and the physician. **LO 30.** Should be involved in patient rights-sensitive medical activities **LO 31.** Should adopt that the primary duty of the physician is to prevent diseases and to protect the life and health of the patients. **LO 32.** Must be in contact with social service institutions in the practice of the profession of medicine.	**Professional Skill Practice Exam** **Laboratory Practice Exam**

COMMITTEE I: PREVENTIVE HEALTH AND MEDICAL HUMANITIES

PREVENTIVE HEALTH AND MEDICAL HUMANITIES COMMITTEE LEARNING METHODS	
Learning Methods	**Learning Practices**
TRAINING FOR KNOWLEDGE	- Classroom lectures / Trainer presentations - Independent learning
TRAINING FOR BASIC MEDICAL PRACTICES	- Professional skill practices - Laboratory practices - Independent learning practices
TRAINING FOR PROFESSIONALISM	- Professional skill practices - Laboratory practices

PREVENTIVE HEALTH AND MEDICAL HUMANITIES COMMITTEE ASSESSMENT METHODS	
END OF THE COMMITTEE THEROTICAL EXAM	It consist of multiple choice questions. **Level 1:** Multiple choice questions evaluating clinical information. **Level 2:** Case-based multiple choice questions evaluating clinical decision-making.
THEROTICAL MIDTERM EXAM	It is done on boards longer than four weeks It is consist of right-wrong answer questions
PRACTICE EXAM	Basic medical practices are evaluated. **Structured practice (PSP) / practice exam**
CALCULATION OF COMMITTEE SUCCESS SCORE	**Committee examination score:** If midterm exam has been done, 85% of the theoretical examination score of the committee and 15% of the midterm examination score is calculated and the committee examination score is determined. **Structured practice (PSP) / practice exam score:** The effect on the committee examination score is calculated according to the IUMF exam directive.

TERM I EDUCATION-TRAINING PROGRAM

AIM

During the first year, medical students who have completed preparatory English language education will primarily learn structure and function of human cells and microorganisms in a variety of molecular, biochemical, biophysical, physiological perspectives. Measurement and statistical evaluation of the scientific data is encouraged. To gain awareness about the meaning of human behaviors in relation to health, illness, health care and patient-physician relationship and to be aware of the experiences in history, literature, art, philosophy, ethics, law, anthropology, sociology and theology. To raise awareness about the regulations and services for the protection of health and prevention of diseases. Improvement of communication skills and basic information technologies in medicine is also promoted in a variety of ways. The students are introduced to good medical practice and will get basic skills in emergency life support and on routine medical examination. To gain information about the normal structure and functions of musculoskeletal systems. Within the scope of evidence-based medicine, students are endowed with skills necessary for accession to medical records and are mentored for critical review of published literature that finally culminate in a poster presentation at the end of the year.

Term I, 2026- 2027 (Academic Year, 34 Weeks)*

No.	Committee	Start - End	Week	Theoretical	Practical	ECTS
101	Preventive Health And Medical Humanities	7 September 2026 - 16 October 2026	6 weeks	106	30	9
102	Molecular Basis of Life and The Cell	19 October 2026 - 4 December 2026	7 weeks	119	43	12
103	Genetics and Life Cycle	8 December 2026 - 6 February 2027	7 weeks	117	44	12
104	Skeleton System	8 February 2027 - 26 March 2027	6 weeks	77	52	12
105	Muscle System	29 March 2027 - 28 May 2027	8 weeks	84	47	15

2026-2027 ACADEMIC YEAR TERM I
COMMITTEE II: MOLECULAR BASIS OF LIFE AND THE CELL

MOLECULAR BASIS OF LIFE AND THE CELL COMMITTEE AIM

This module aims to explain the structure, function and synthesis pathways of macromolecules in cells. The structure and properties of basic molecules of living organisms such as carbohydrates, lipids, nucleic acids, as well as the effects of post-translational modifications to the properties and structures of amino acids present in proteins will be described. The course aims to provide students with a basic understanding of the molecular architecture of eukaryotic cells and organelles, including the principles of cell membrane structure and dynamics, bioenergetics and enzyme catalysis. At the cellular level, the issues will include: diffusion, membrane potentials, ion channels, synapses, action potentials, contraction of muscle cells and neural coding.

Molecular Basis Of Life and the Cell Committee Learning Objectives	Measurement Evaluation Methods
Knowledge	
LO 1. Should define atom structure **LO 2.** Should know covalent and non-covalent interactions that are important in Biology **LO 3.** Understand the concepts of binding and isomerism in organic chemistry **LO 4.** Should know conformational isomers, geometric isomers and sterioisomers **LO 5.** Should learn functional groups in biomolecules **LO 6.** Should know chemical and physical properties of water **LO 7.** Should know the concepts of pH and buffer solution **LO 8.** Must have basic knowledge about living things and ecosystem **LO 9.** Should learn different microscopic methods, magnification and resolution limits and tissue preservation **LO 10.** Have knowledge about cell membrane structure and functions **LO 11.** Should know connective tissue cells, fibers and tissue types **LO 12.** Should learn protein synthesis in the cell **LO 13.** Should know the structure and functions of biological macromolecules **LO 14.** Should be know the specific features, epithelial types and its functions **LO 15.** Should know connective tissue cells, fibers and tissue types **LO 16.** Should learn the physical principles of medical imaging **LO 17.** Should explain how membrane potential is formed and maintained **LO 18.** Should explain the types and functions of posttranslational changes in proteins **LO 19.** Should be able to establish structure-function relationship between hemoglobin and myoglobin proteins **LO 20.** Can define cell differences, prokaryote and eukaryotic cells **LO 21.** Should explain the phases of cell cycle and mitosis **LO 22.** Should know the classification and kinetics of enzymes **LO 23.** Shoul be able to explain the processes during meiosis and gametogenesis **LO 24.** Should define different types and functions of nucleic acids **LO 25.** Should define the connections of the cell with the environment **LO 26.** Should learn nucleotide types and synthesis pathways	**Theoretical Exam** **Midterm Exam**

2026-2027 ACADEMIC YEAR TERM I
COMMITTEE II: MOLECULAR BASIS OF LIFE AND THE CELL

Skill	
LO 27. Should apply laboratory rules, recognize laboratory materials, prepare solutions and measure Ph **LO 28.** Should learn about microscope and microscope parts, how to prepare the preps and the methods of examination **LO 29.** Should be gain local drug application skills **LO 30.** Should help emergency situations at work **LO 31.** Must be able to measure vital signs and blood glucose levels	**Professional Skill Practice Exam** **Laboratory Practice Exam**
Professionalism	
LO 32. Should exhibit a holistic approach to health (bio psycho- social and cultural) **LO 33.** Should develop communication skills and communicate in difficult situations **LO 34.** Should behave within the physician roles and limits **LO 35.** Should be aware of the social status of the physician, the rules that determine the **LO 36.** Should be involved in patient rights-sensitive medical activities **LO 37.** Must have a program evaluation culture	**Professional Skill Practice Exam** **Laboratory Practice Exam**

COMMITTEE II: MOLECULAR BASIS OF LIFE AND THE CELL

MOLECULAR BASIS OF LIFE AND THE CELL COMMITTEE LEARNING METHODS	
Learning Methods	**Learning Practices**
TRAINING FOR KNOWLEDGE	- Classroom lectures/Trainer presentations - Independent learning
TRAINING FOR BASIC MEDICAL PRACTICES	- Professional skill practices - Laboratory practices - Independent learning practices
TRAINING FOR PROFESSIONALISM	- Professional skill practices - Laboratory practices

MOLECULAR BASIS OF LIFE AND THE CELL COMMITTEE ASSESSMENT METHODS	
END OF THE COMMITTEE THEROTICAL EXAM	It consist of multiple choice questions. **Level 1:** Multiple choice questions evaluating clinical information. **Level 2:** Case-based multiple choice questions evaluating clinical decision-making.
THEROTICAL MIDTERM EXAM	It is done on boards longer than four weeks It is consist of right-wrong answer questions
PRACTICE EXAM	Basic medical practices are evaluated. **Structured practice (PSP)/practice exam**
CALCULATION OF COMMITTEE SUCCESS SCORE	**Committee examination score:** If midterm exam has been done, 85% of the theoretical examination score of the committee and 15% of the midterm examination score is calculated and the committee examination score is determined. **Structured practice (PSP)/practice exam score:** The effect on the committee examination score is calculated according to the IUMF exam directive.

20.10.2026	14.05-14.50	PHY102	Introduction to physiology and homeostasis	Nurettin Aydoğdu	
20.10.2026	15.00-15.45	HE102	Microscopy and histological techniques	Mehmet Gül	
20.10.2026	15.55-16.40	HE102	Microscopy and histological techniques	Mehmet Gül	
Wednesday					
21.10.2026	08.30-09.15	EBM102	Evidence Based Medicine		
21.10.2026	09.25-10.10	EBM102	Evidence Based Medicine		
21.10.2026	10.20-11.05	EBM102	Evidence Based Medicine		
21.10.2026	11.15-12.00	EBM102	Evidence Based Medicine		
21.10.2026	13.10-13.55	UEC	Elective Course		
21.10.2026	14.05-14.50	UEC	Elective Course		
21.10.2026	15.00-15.45	UEC	Elective Course		
21.10.2026	15.55-16.40	UEC	Elective Course		
Thursday					
22.10.2026	08.30-09.15	MBG102	Organelles and their functions	Yılmaz Çiğremiş	
22.10.2026	09.25-10.10	MBG102	Organelles and their functions	Yılmaz Çiğremiş	
22.10.2026	10.20-11.05	BP102	The cell membrane: from fluid mosaic to a dynamic platform	Gökhan Zorlu	
22.10.2026	11.15-12.00	BP102	The cell membrane: from fluid mosaic to a dynamic platform	Gökhan Zorlu	
22.10.2026	13.10-13.55	MB102	Organic compounds/functional groups	Tayfun Güldür	
22.10.2026	14.05-14.50	MB102	Organic compounds/functional groups	Tayfun Güldür	
22.10.2026	15.00-15.45	PHY102	Biorhythm	Nurettin Aydoğdu	
22.10.2026	15.55-16.40	PHY102	Biorhythm	Nurettin Aydoğdu	
Friday					
23.10.2026	08.30-09.15	HE102	Endoplasmic reticulum, ribosomes	Azibe Yıldız	
23.10.2026	09.25-10.10	HE102	Golgi Complex, mitochondria	Azibe Yıldız	
23.10.2026	10.20-11.05	MB102	Introduction to carbohydrates	Çağatay Taşkapan	
23.10.2026	11.15-12.00	MB102	Reaction of monosaccharides	Çağatay Taşkapan	
23.10.2026	13.30-14.15	APHR102	Ataturk's Principles and History of Revolution		
23.10.2026	14.25-15.10	APHR102	Ataturk's Principles and History of Revolution		
23.10.2026	15.20-16.05	TL102	Turkish Language		
23.10.2026	16.15-17.00	TL102	Turkish Language

2026-2027 ACADEMIC YEAR TERM I
COMMITTEE II: MOLECULAR BASIS OF LIFE AND THE CELL

Date	Hour	Code	Lecture title	Instructor	Group
Monday					
26.10.2026	08.30-09.15		Self study		
26.10.2026	09.25-10.10		Self study		
26.10.2026	10.20-11.05		Self study		
26.10.2026	11.15-12.00	MB102	Polysaccharides	Çağatay Taşkapan	
26.10.2026	13.10-13.55	MB102	Acids and bases	Tayfun Güldür	
26.10.2026	14.05-14.50	MB102	Water and pH	Tayfun Güldür	
26.10.2026	15.00-15.45	MBG102	LAB (identification to cell structure in various cells)	Yılmaz Çiğremiş	
26.10.2026	15.55-16.40		Self study		
Tuesday					
27.10.2026	08.30-09.15	MB102	Water and pH	Tayfun Güldür	
27.10.2026	09.25-10.10	HE102	Lysosomes, peroxisomes, proteasomes	Azibe Yıldız	
27.10.2026	10.20-11.05	BP102	Passive transport across the membrane and clinical reflections of osmosis	Gökhan Zorlu	
27.10.2026	11.15-12.00	BP102	Passive transport across the membrane and clinical reflections of osmosis	Gökhan Zorlu	
27.10.2026	13.10-13.55	MB102	Introduction to lipids	Elif Gürel	
27.10.2026	14.05-14.50	MB102	Introduction to lipids	Elif Gürel	
27.10.2026	15.00-15.45		Self study		
27.10.2026	15.55-16.40		Self study		
Wednesday					
28.10.2026	08.30-09.15	EBM102	Evidence Based Medicine		
28.10.2026	09.25-10.10	EBM102	Evidence Based Medicine		
28.10.2026	10.20-11.05	EBM102	Evidence Based Medicine		
28.10.2026	11.15-12.00	EBM102	Evidence Based Medicine		
28.10.2026	13.10-13.55		**REPUBLIC DAY**		
28.10.2026	14.05-14.50				
28.10.2026	15.00-15.45				
28.10.2026	15.55-16.40				
Thursday					
29.10.2026	08.30-09.15		**REPUBLIC DAY**		
29.10.2026	09.25-10.10				
29.10.2026	10.20-11.05				
29.10.2026	11.15-12.00				
29.10.2026	13.10-13.55				
29.10.2026	14.05-14.50				
29.10.2026	15.00-15.45				
29.10.2026	15.55-16.40				
Friday					
30.10.2026	08.30-09.15	PSP102	Application of drops, ointment, spray, and drug	Ahmet Çakır	Group-I
30.10.2026	09.25-10.10	PSP102	Respiration and pulse rate counts per minute	Aslıhan Mete Yıldırım	Group-I
30.10.2026	10.20-11.05	MB102	Introduction to lipids	Elif Gürel	
30.10.2026	11.15-12.00	MB102	Buffers	Tayfun Güldür	
30.10.2026	13.30-14.15	APHR102	Ataturk's Principles and History of Revolution		
30.10.2026	14.25-15.10	APHR102	Ataturk's Principles and History of Revolution

23.11.2026	15.00-15.45		Self study		
23.11.2026	15.55-16.40		Self study		
Tuesday					
24.11.2026	08.30-09.15	MB102	Hemoglobin and myoglobin	Mehmet Erman Erdemli	
24.11.2026	09.25-10.10	MB102	Hemoglobin and myoglobin	Mehmet Erman Erdemli	
24.11.2026	10.20-11.05	HE102	Cell connections and secreting epithelium	Nigar Vardı	
24.11.2026	11.15-12.00	HE102	Cell connections and secreting epithelium	Nigar Vardı	
24.11.2026	13.10-13.55	MB102	Enzymes	Cuma Mertoğlu	
24.11.2026	14.05-14.50	MB102	Enzymes	Cuma Mertoğlu	
24.11.2026	15.00-15.45		Self study		
24.11.2026	15.55-16.40		Self study		
Wednesday					
25.11.2026	08.30-09.15	HE102	LAB (Secreting epithelium)	Aslı Taşlıdere-Azibe Yıldız	
25.11.2026	09.25-10.10	HE102	LAB (Secreting epithelium)	Aslı Taşlıdere-Azibe Yıldız	
25.11.2026	10.20-11.05	HE102	Connective tissue cells	Elif Karaca	
25.11.2026	11.15-12.00	HE102	Connective tissue cells	Elif Karaca	
25.11.2026	13.10-13.55	UEC	Elective Course		
25.11.2026	14.05-14.50	UEC	Elective Course		
25.11.2026	15.00-15.45	UEC	Elective Course		
25.11.2026	15.55-16.40	UEC	Elective Course		
Thursday					
26.11.2026	08.30-09.15	HE102	LAB (Cover epithelium)	Mehmet Gül-Aslı Taşlıdere	
26.11.2026	09.25-10.10	HE102	LAB (Cover epithelium)	Mehmet Gül-Aslı Taşlıdere	
26.11.2026	10.20-11.05	MB102	Protein synthesis	Mehmet Erman Erdemli	
26.11.2026	11.15-12.00	MB102	Protein synthesis	Mehmet Erman Erdemli	
26.11.2026	13.10-13.55	MB102	Enzymes	Cuma Mertoğlu	
26.11.2026	14.05-14.50	MB102	Enzymes	Cuma Mertoğlu	
26.11.2026	15.00-15.45		Self study		
26.11.2026	15.55-16.40		Self study		
Friday					
27.11.2026	08.30-09.15	MB102	Cell membrane biochemistry	Yusuf Türköz	
27.11.2026	09.25-10.10	MB102	Posttranslational modifications of proteins	Mehmet Erman Erdemli	
27.11.2026	10.20-11.05	HE102	Connective tissue fibers and principle substance	Elif Karaca	
27.11.2026	11.15-12.00	HE102	Connective tissue types	Elif Karaca	
27.11.2026	13.30-14.15	APHR102	Ataturk's Principles and History of Revolution		
27.11.2026	14.25-15.10	APHR102	Ataturk's Principles and History of Revolution		
27.11.2026	15.20-16.05	TL102	Turkish Language		
27.11.2026	16.15-17.00	TL102	Turkish Language		

INONU UNIVERSITY
FACULTY OF MEDICINE

2026-2027 ACADEMIC YEAR TERM I
COMMITTEE II: MOLECULAR BASIS OF LIFE AND THE CELL

Date	Hour	Code	Lecture title	Instructor	Group
Monday					
30.11.2026	08.30-09.15		Self study		
30.11.2026	09.25-10.10	MB102	Laboratory safety	Çağatay Taşkapan	
30.11.2026	10.20-11.05	HE102	LAB (Connective Tissue)	Aslı Taşlıdere-Azibe Yıldız	
30.11.2026	11.15-12.00	HE102	LAB (Connective Tissue)	Aslı Taşlıdere-Azibe Yıldız	
30.11.2026	13.10-13.55	TB102	Connective tissue biochemistry and the extracellular matriks	Cuma Mertoğlu	
30.11.2026	14.05-14.50	TB102	Connective tissue biochemistry and the extracellular matriks	Cuma Mertoğlu	
30.11.2026	15.00-15.45	TB102	Connective tissue biochemistry and the extracellular matriks	Cuma Mertoğlu	
30.11.2026	15.55-16.40		Self study		
Tuesday					
01.12.2026	08.30-09.15		Self study		
01.12.2026	09.25-10.10		Self study		
01.12.2026	10.20-11.05		Self study		
01.12.2026	11.15-12.00		Self study		
01.12.2026	13.10-13.55		Self study		
01.12.2026	14.05-14.50		Self study		
01.12.2026	15.00-15.45		Self study		
01.12.2026	15.55-16.40		Self study		
Wednesday					
02.12.2026	08.30-09.15	EBM102	Evidence Based Medicine		
02.12.2026	09.25-10.10	EBM102	Evidence Based Medicine		
02.12.2026	10.20-11.05	EBM102	Evidence Based Medicine		
02.12.2026	11.15-12.00	EBM102	Evidence Based Medicine		
02.12.2026	13.10-13.55	UEC	Elective Course		
02.12.2026	14.05-14.50	UEC	Elective Course		
02.12.2026	15.00-15.45	UEC	Elective Course		
02.12.2026	15.55-16.40	UEC	Elective Course		
Thursday					
03.12.2026	08.30-09.15		Self study		
03.12.2026	09.25-10.10	EXAM	**THEORICAL EXAM**		
03.12.2026	10.20-11.05	EXAM			
03.12.2026	11.15-12.00		**End-Of-Committee Evaluation and Question Sharing Time**		
03.12.2026	13.10-13.55		Self study		
03.12.2026	14.05-14.50		Self study		
03.12.2026	15.00-15.45		Self study		
03.12.2026	15.55-16.40		Self study		
Friday					
04.12.2026	08.30-09.15	EXAM	**PRACTICAL EXAM**		
04.12.2026	09.25-10.10	EXAM			
04.12.2026	10.20-11.05	EXAM			
04.12.2026	11.15-12.00	EXAM			
04.12.2026	13.30-14.15	APHR102	Ataturk's Principles and History of Revolution		
04.12.2026	14.25-15.10	APHR102	Ataturk's Principles and History of Revolution		
04.12.2026	15.20-16.05	TL102	Turkish Language		
04.12.2026	16.15-17.00	TL102	Turkish Language
